Pacific Life — Commission Processing Rules

Carrier Name: Pacific Life Insurance Company **Aliases**: Pacific Life **Products**: Life / Annuity (Med Supp or other confirm with Janki if new product types appear) **Date Added**: 2026-06-18

Overview

Pacific Life commissions are entered **manually into APL** (not imported via CSV). Each policy is processed row by row. The key decision tree is:

1. Is this policy already in APL (previously paid)?
2. If new business — what is the pay mode?
3. Is the agent on advance?

Step-by-Step Processing Workflow

STEP 1 — Check If Policy Already Exists in APL

Before doing anything, look up the policy number in APL.

Scenario	Action
Policy number **already exists** (previously paid)	Add the new transaction to the existing policy record. Use the correct paid-to-date.
Policy number **does not exist** (New Business)	Proceed to Step 2.

> ⚠️ Always verify the paid-to-date matches what Pacific Life is paying through — do not copy the effective date as the paid-to-date.

STEP 2 — New Business: Check the Pay Mode

For new business policies, identify the **Pay Mode** from the Pacific Life statement:

Pay Mode Code	Meaning
M	Monthly
A	Annually
Q	Quarterly

STEP 3A — Pay Mode = M (Monthly)

Monthly pay mode policies **may be advanced**. Follow this sub-flow:

3A-i: Check Agent Roster — Is the Agent on Advance?

Look up the writing agent in the Agent Roster.

✅ If Agent IS on Advance:

1. **Pick the ADV 9-Month NPN** for this agent (do not use their regular NPN).
2. Enter the policy details in APL.
3. **Select the correct product.**
4. **Set the paid-to-date correctly:**
    - The effective date (EFF DATE) must **not** be the same as the paid-to-date.
    - Example: If EFF DATE is 5/1/2026, paid-to-date should reflect the advance period — not the same date.
5. **Pay Code = AV** (Advance).
6. **Platform = APL.**
7. **Calculate both the NB cycle and the RN cycle.**
8. Verify the payment is calculating correctly before saving.

✅ If Agent is NOT on Advance:

1. Enter the agent's **regular NPN** (from Agent Roster — never use the NPN from the carrier statement).
2. Enter the policy details and select the correct product.
3. **Pay Code = AE** (As Earned).
4. **Calculate the RN cycle only.**
5. Verify the payment is calculating correctly before saving.

STEP 3B — Pay Mode = A (Annually) or Q (Quarterly)

> ⚠️ **Do NOT advance annual or quarterly pay mode policies — regardless of whether the agent is on advance.**

For annual and quarterly pay modes:

1. **Do not use the ADV 9-month NPN.** Use the agent's regular NPN.
2. **Pay Code = AE** (As Earned).
3. The **paid-to-date must match the pay mode period:**

Pay Mode	Paid-To-Date Rule	Example
A (Annual)	Paid-to-date = 1 full year from effective date	EFF: 5/1/2026 → Paid-To: 5/1/2027
Q (Quarterly)	Paid-to-date = 1 quarter from effective date	EFF: 5/1/2026 → Paid-To: 8/1/2026

4. **Calculate the RN cycle.**
5. Verify the payment is calculating correctly before saving.

Quick Reference Decision Tree

```None
Is the policy already in APL?
├── YES → Add transaction, use correct paid-to-date. DONE.
└── NO (New Business) → Check Pay Mode
    ├── Pay Mode = M (Monthly)
    │   ├── Agent ON advance?
    │   │   ├── YES → Use ADV 9-month NPN, Pay Code AV, calculate NB + RN cycles
    │   │   └── NO  → Use regular NPN, Pay Code AE, calculate RN cycle only
    │   └── ✅ Advance is allowed for monthly
    ├── Pay Mode = A (Annual)
    │   └── ⛔ Do NOT advance — Pay Code AE, paid-to-date = EFF + 1 year
    └── Pay Mode = Q (Quarterly)
        └── ⛔ Do NOT advance — Pay Code AE, paid-to-date = EFF + 1 quarter
```

Key Rules & Reminders

Rule	Detail
Never use carrier NPN	Always look up the agent in the Agent Roster and use the APL NPN
EFF DATE ≠ Paid-To-Date	These must never be the same date — always verify
Advance = Monthly only	Only M pay mode policies can be advanced — A and Q are always AE
ADV NPN = advance only	The 9-month ADV NPN is only used when the agent is on advance AND pay mode is monthly
Always verify calculation	After entering, confirm the NB and/or RN cycle is calculating the correct amount before saving
Paid-To-Date for A/Q	Must reflect the full period — annual = +1 year, quarterly = +3 months from EFF date

---

Carrier-Specific Notes

- Pacific Life is processed **manually in APL** — there is no bulk import/CSV workflow for this carrier.
- If a new product type appears on the statement that isn't listed above, **stop and ask Janki** before processing.
- If a chargeback appears, follow universal Rule 4 (check APL history for AE vs AV, flag AV chargebacks for manual review).
- Always apply the Transfer Sheet check (universal Rule 6) before processing any row.
