

STANDARD OPERATING PROCEDURE

Mutual of Omaha (MOO)

Commission Statement Processing

Main Line Benefits LLC | Production No: 1055790

Prepared: April 2026

QUICK REFERENCE SUMMARY

Use this table as a quick checklist when processing. Follow each step in order.

Step	Action	Key Rule
1	Copy DETAILS to Clean Sheet	Never touch the original DETAILS tab
2	Delete unneeded columns, add new columns	7 columns deleted, 7 columns added
3	Clean AV9 from MLB Agent IDs	Ctrl+Find AV9 and remove. #N/A means new policy
4	VLOOKUP to populate all columns from BOB and APL	Match all lookups on Policy Number only
4B	Check for duplicate transactions on statement	Same policy number appearing twice = duplicate. Delete one line.
5	Process chargebacks FIRST	Check APL first. Each CB is different. No CB if MLB never paid.
6	Handle new policies (N/A entries)	Highlight all. Verify every one individually after upload.
7	Apply correct payment mode rules	M=monthly, Q=quarterly divide by 3, A=full annual, SA=full 6 months
8	Verify pay codes and upload to APL	AV=advance, AE=as-earned, AV1=towards debit balance

Video Resources

Watch these training videos alongside this SOP for visual guidance:

Overview

This SOP covers the complete process for processing a Mutual of Omaha (MOO) carrier commission statement. Follow each step in order without skipping. This document is written so that a first-time processor can complete the task accurately.

KEY RULE: MOO pays 9 months advance on ALL new monthly policies for ALL agents. Maximum advance cap is \$2,000. Always cross-reference the Agent Roster to determine if an agent is on advance or as-earned.

REQUIRED DOCUMENTS AND FILES

Gather ALL of the following before you begin processing. Have them open and ready.

#	File / Document	Source	Mandatory?
1	Carrier Statement (MOO Excel file)	Received from MOO. It contains SUMMARY and DETAILS tabs.	YES
2	Book of Business (BOB)	Downloaded from MOO carrier website (see steps below).	YES
3	Agent Roster	Internal file. Contains agent names, NPNs, and advance status.	YES
4	Agent Rule Checklist	Internal rulebook. Commission rates and pay rules per agent.	YES
5	APL Policy List	Exported from APL database. All previously paid policies.	RECOMMENDED

How to Download the Book of Business (BOB)

1. Log in to the Mutual of Omaha website
2. Click Mutual of Omaha on the top-left blue ribbon
3. Under Recent Reports, enter PIN: 4575 and click Submit
4. On the right-hand side, click Book of Business Download
5. Click Download My Book of Business
6. Select Download CSV for Excel. This downloads the full BOB.

STEP 1: COPY DETAILS TO CLEAN SHEET

7. Open the MOO carrier statement Excel file
8. Go to the DETAILS tab
9. Select ALL data using Ctrl + A. Copy every row and column exactly as-is.
10. Create a new sheet and name it Clean Sheet
11. Paste all data onto the Clean Sheet

CRITICAL: NEVER touch or edit the original DETAILS tab. All work is done on the Clean Sheet only. The DETAILS tab is your backup reference.

STEP 2: CLEAN UP COLUMNS

Columns to DELETE from the Clean Sheet

Remove the following columns. They are not needed for processing.

Column	Field Name	Reason
A	Company Name	Not needed for processing
B	Paid Producer	Not needed for processing
C	MGA Name	Not needed for processing
L	Age	Not needed for processing
N	Bill Type	Not needed for processing

P	Face Amount	Not needed for processing
T	Split %	Not needed for processing

Columns to ADD to the Clean Sheet

Add the following new columns. These will be populated via VLOOKUP in Step 4.

New Column	Source	Notes
Producer Name	Book of Business	Agent name. Not included on the statement.
MLB Agent	APL Policy List	Agent name as recorded in APL.
MLB Agent ID	APL Policy List	Internal MLB agent ID and NPN. See AV9 rule in Step 3.
BOB Monthly Premium	Book of Business	True monthly premium. Do not use statement comm premium for new policies.
BOB Monthly Comm	Calculated via formula	Formula: BOB Monthly Premium multiplied by Comm % multiplied by 100.
BOB Product	Book of Business	Product type. Not included on the statement.
MLB Product	APL Policy List	Product as previously recorded in APL.

STEP 3: MLB AGENT ID AND AV9 RULE

After pulling MLB Agent IDs from the APL Policy List, apply the following rules before moving on. This is one of the most important steps to prevent errors.

What You See in MLB Agent ID Column	What It Means	Action to Take
NPN ending in AV9 (example: 12345AV9)	Agent was previously paid an advance by MLB	Use Ctrl+Find on the entire column. Find AV9 and replace with blank. This removes AV9 from all existing entries to prevent accidentally advancing them again.
#N/A	Brand new policy. Never paid before in APL.	If agent IS on advance: use their NPN with AV9 at the end. If agent is NOT on advance: use their normal NPN with no AV9.

WARNING: Always clean AV9 from existing policies BEFORE you do anything else in this step. Double-advancing an agent is a serious error that is difficult to reverse.

STEP 4: POPULATE COLUMNS VIA VLOOKUP

Use VLOOKUP to pull all required information from the BOB and APL Policy List onto the Clean Sheet. Match ALL lookups using the Policy Number column only.

- Producer Name: from BOB, match on Policy Number
- MLB Agent and MLB Agent ID: from APL Policy List, match on Policy Number
- BOB Monthly Premium: from BOB, PREMIUM column, match on Policy Number
- BOB Monthly Comm: calculated using formula. BOB Monthly Premium x Comm % x 100.
- BOB Product: from BOB, PRODUCT_DESC column, match on Policy Number
- MLB Product: from APL Policy List, Product column, match on Policy Number

NOTE: Complete all VLOOKUP population BEFORE moving to chargebacks or new policy processing. All data must be in place first.

STEP 4B: CHECK FOR DUPLICATE TRANSACTIONS

After completing your VLOOKUPs, check the entire statement for duplicate transactions BEFORE processing anything. This must be done before uploading to APL.

Why Duplicates Happen

When a new policy is paid and the agent is on advance, that policy can appear TWICE on the MOO statement. One line represents the advance payment to the agent and the other line represents the amount being applied towards the advanced balance. MOO lists both transactions separately.

How to Spot a Duplicate

Filter or sort the Policy Number column and look for the same policy number appearing more than once. A true duplicate will have all of the following matching exactly:

- Same Policy Number
- Same Insured Name
- Same Paid To Date
- Same all fields across both rows

The way to tell them apart is: one line will show an advance payment and the other will show the amount applied towards the advanced balance.

Field	Detail
Why It Happens	MOO lists both the advance paid out AND the amount applied towards the debit balance as separate lines for new advance policies.
How to Spot It	Same policy number, same insured name, same paid to date, and same fields appearing twice. One line will be the advance and the other will be applied towards advance.
Action	DELETE one of the duplicate lines from the Clean Sheet. Only process ONE transaction per policy.
Real Example	Policy BU6520731 for Lewis Amanda on the 4/9/26 statement appears twice. Delete one line and pay only once.
Risk if Ignored	Agent gets double-paid. This is a serious overpayment error.

ALWAYS CHECK FOR DUPLICATES: Always filter the Policy Number column and check for duplicates BEFORE uploading to APL. One policy equals one transaction only.

STEP 5: PROCESS CHARGEBACKS FIRST

Before processing any other policies, identify and handle ALL chargebacks. Each chargeback must be investigated individually. They are all treated differently.

How to Identify Chargebacks

- Filter the Comm Premium column from Smallest to Largest
- Any NEGATIVE value is a chargeback
- The Activity Type column will show BFY REVERSAL or a similar refund or reversal term

How to Investigate Each Chargeback

12. Go to APL database. Click Policies. Search the policy number. Check how much and when the agent was paid.
13. Log in to the Mutual of Omaha site. Go to the right-hand side and click Update Profile. Click Clients. Click Policy Management in blue.
14. Under Policy Management (Sales Professional Access), enter the policy number. Click Search. Click View Details.
15. Scroll down to Customer Action Events. Open and read to find the reason such as Potential Lapse, Member Canceled, or Payment Returned.

GOLDEN RULE: The number one rule: Always check APL FIRST to confirm if and what you actually paid the agent before doing any chargeback. If MLB never paid the agent for that period, NO CHARGEBACK IS NEEDED. Simply delete that line from the Clean Sheet.

Chargeback Scenarios

Scenario A: Agent NOT on Advance, Monthly Lapse (1 Month)

Field	Detail
Agent Advance Status	NOT on advance (as-earned)
What Happened	Customer stopped paying premium. Potential Lapse shown in Customer Action Events on MOO site.
What MLB Paid	Monthly commission amount only (example: \$209.15 per month)
Action	Enter NEGATIVE monthly premium in the BOB Monthly Premium column (example: -\$309.85). The formula automatically calculates the negative BOB Monthly Comm. Do a 1 month chargeback only.
Real Example	Policy BU5336528 for Gregory Teipel and Miglio Salvatore on the 4/9/26 statement. Potential Lapse. Paid to 3/28/26. Chargeback for 4/28/26. Enter - \$309.85 which auto-calculates to -\$209.15 comm. 1 month chargeback.

Scenario B: Agent NOT on Advance, Full Policy Cancellation

Field	Detail
Agent Advance Status	NOT on advance (as-earned)
What Happened	Policy fully canceled. MOO does a full chargeback of their 9-month advance. But MLB only paid agent monthly amounts.
What MLB Paid	Only the monthly amounts actually paid. Check APL commission history for all transactions on this policy.
Action	IGNORE MOO's full chargeback amount. Chargeback ONLY what MLB actually paid the agent. Add up all months paid from APL and enter that total as the chargeback.
Real Example	Policy BU6404920 for Ryan Caltajrone on the 3/19/26 statement. MOO charged back \$1,471.77 which was their 9-month advance. MLB paid Ryan \$163.53 for 2 months which equals \$327.06 total. Chargeback is -\$327.06 only.

Scenario C: Agent IS on Advance, Full 9 Months Advanced and FULL Chargeback (Policy Never Active or Fully Canceled)

Field	Detail
Agent Advance Status	ON advance. MLB paid full 9 months AV.

What Happened	Policy fully canceled. MOO does a full chargeback. MLB had paid the agent the full 9-month advance.
What MLB Paid	Full 9-month advance was paid to agent.
Action	Do a full chargeback of everything MLB paid. This fully charges back what was paid AND reduces the debit balance by the same amount. DO NOT use the duplicate method here. The duplicate method is only for partial chargebacks where the agent still needs to be paid for some active months.
Real Example	Policy BU5460754 for Thomas Purdue and Davis Crystal on the 8/21/25 statement. Monthly premium \$254.65. Monthly comm \$343.78. MLB paid full 9 months AV. Member canceled. Full chargeback applied. No duplicate method needed.

Scenario C2: Agent IS on Advance, Full 9 Months Advanced but Only SOME Months Active (Partial Chargeback)

Field	Detail
Agent Advance Status	ON advance. MLB paid full 9 months AV.
What Happened	Policy canceled after only some months active (example: 1 month). MOO does a full chargeback. MLB had paid the agent the full 9-month advance.
What MLB Paid	Full 9-month advance (example: monthly comm \$343.78 x 9 = \$3,094.02 or capped at \$2,000).
Action	Agent keeps commission only for the months the policy was actually active. Chargeback the rest. Use the APL Duplicate Method below. This is the ONLY scenario where the duplicate method applies.
Example for Reference	Example: Agent monthly comm is \$300.00. Policy active for 1 month. MLB paid \$2,000 advance (capped). Agent keeps \$300.00. Chargeback = \$1,700.00. Use duplicate method to pay agent 1 active month as AE on the duplicated policy.

APL Duplicate Method: ONLY for Partial Chargebacks Where Agent Still Gets Paid for Active Months

Use this method ONLY when the policy was active for some months and the agent still needs to be paid for those active months. Do NOT use this for a full chargeback where nothing is owed to the agent.

- Go to APL and find the policy number. Add the number 1 at the end of the policy number manually. Click OK.
- Go back to the same policy and click Duplicate at the bottom of the page next to Cancel.
- On the duplicated policy, remove the 1 from the end of the policy number. Click OK. This creates an identical duplicate policy with all the same details.
- On the DUPLICATED policy, make the following changes:
 - Change the writing agent NPN: remove AV9 and use the normal NPN (as-earned)
 - Change the Commission Pay Code from AV to AE (as-earned)
 - Click OK
- If the policy was active for 1 month for example, take that 1 month transaction first.
- Go to the ORIGINAL policy (the one with 1 at the end). Go to Commission History and click Rescind.
- Add the renewal date for the current period and save. This sends the transaction to the newly duplicated policy ID.
- Refresh, recalculate, and pay the duplicated policy for only the months the policy was actually active.

VIDEO REFERENCE: See Video 1 for a full visual walkthrough of this process:
<https://www.loom.com/share/cee03310e2e94f3db97dceb5a063b620>

Scenario D: No Chargeback Needed

Field	Detail
What Happened	A chargeback appears on the statement but MLB never paid the agent for that period.
How to Check	Go to APL and look up the policy. Check the last paid-to date. If the last MLB payment was before the chargeback period then MLB never paid it.
Action	DELETE that line from the Clean Sheet. No chargeback is processed.
Real Example	Policy BU5260130 for Gregory Teipel and Steven Schuetz on the 4/9/26 statement. Annual policy. MOO charged back for 4/28/26. MLB last paid 12/20/25. MLB never paid the 4/28/26 period so no chargeback is needed. Delete the line.

STEP 6: PROCESS NEW POLICIES (N/A Entries)

After chargebacks are handled, identify and process all new policies that appear on the statement for the first time.

How to Identify New Policies

- Filter the MLB Product column
- #N/A entries mean the policy has never been paid before in APL. These are new policies.
- Also filter BOB Product for #N/A to cross-check

Steps for Each New Policy

24. Highlight all new policy rows using a color such as yellow to flag them for extra attention
25. For each new policy, fill in the following:
 - o Correct MLB Product: look up in APL Settings and Products to find the matching product
 - o Correct Producer NPN: if agent IS on advance, use NPN with AV9. If agent is NOT on advance, use normal NPN.
 - o Correct commission rates: reference the Agent Rule Checklist
 - o MLB Agent: pull from Agent Roster
26. Keep the Agent Rule Checklist open on the side at all times while processing new policies
27. Once all information is filled in, copy everything to the APL Upload File
28. Upload the file to the APL database
29. After upload, individually check EACH new policy in APL to verify:
 - o Correct agent assigned
 - o Correct product assigned
 - o Correct commission rate
 - o Advance vs. as-earned is correctly set
 - o Correct monthly premium

NO SHORTCUTS: Zero shortcuts on new policies. Every single new policy MUST be individually verified in APL after upload. No exceptions.

STEP 7: PAYMENT MODE RULES

The Mode column on the Clean Sheet tells you how premiums are billed. This determines how you pay the agent. Always check Mode before processing each policy.

Mode	Meaning	On Advance (AV) Agents	As-Earned (AE) Agents
M	Monthly	Check Agent Roster. If agent is on advance, pay 9 months AV with a maximum cap of \$2,000.	Pay the monthly as-earned amount only.

Q	Quarterly. 3 months paid at once.	Divide the premium and comm by 3 and pay 3 months AV per AV schedule. If APL already paid 9 months AV on this policy, pay towards debit balance using AV1 until 9 months are fulfilled.	Divide the premium and comm by 3 and pay the full 3-month amount as-earned. You will not see this again until next quarter.
A	Annual. 12 months paid at once.	Pay the full annual amount as-earned. You will not see this again until next year.	Pay the full annual amount as-earned. You will not see this again until next year.
SA	Semi-Annual. 6 months paid at once.	MOO pays us 6 months AV so pay the agent 6 months AV.	Pay the full 6-month amount as-earned. You will not see this again until next period.

KEY RULE: For Annual, Quarterly, and Semi-Annual, ALWAYS pay the full amount to ALL agents regardless of advance status. You will not see that payment again until the next cycle.

STEP 8: PAY CODES AND UPLOAD TO APL

Pay Code Reference

Pay Code	Meaning	When to Use
AV	Advance	Agent is on advance. New monthly policy within the 9-month advance window.
AE	As Earned	Agent is not on advance. Also used for annual, quarterly, and semi-annual policies for all agents.
AV1	Applied Towards Debit Balance	Older policy where the 9-month advance was already paid. Renewal payments go towards debit balance.

Steps to Upload to APL

30. Verify all pay codes on the Clean Sheet are correct. AV, AE, or AV1.
31. Double-check Agent Roster for each agent's advance status
32. Follow the same upload rules used for all other carriers
33. Copy all data to the APL Upload File in CSV format
34. Upload the file to the APL database
35. After upload, review the file the same way as other carriers
36. Check ALL new policies individually using the highlighted rows in APL audit
37. Randomly spot-check renewal and older policies for the following:
 - o Correct pay code: AV, AE, or AV1
 - o Correct commission rate
 - o Correct agent assignment
 - o Correct product

END OF SOP Main Line Benefits LLC Mutual of Omaha Commission Processing
